

Assignment 4 - ERD and Business Rules

1. Project Description

A simple web-based to-do list application that helps users organize and manage their daily tasks and projects. Users can create tasks, mark them as complete, edit existing tasks, and delete tasks they no longer need.

2. Business Rules

Rule 1 (USER to TASK):

<USER> <may> <create> <any number> <TASK>

A USER may create any number of TASKs. However, each TASK must be created by exactly one USER.

Rule 2 (TASK to USER):

<TASK> <must> <belong to> <exactly one> <USER>

Each TASK must be created by exactly one USER. However, a USER may have zero or more TASKs associated with them.

3. Entity Relationship Diagram (ERD)

This diagram follows the textbook notation, including entity boxes, attribute lists, primary identifiers (**underlined**), and relationship cardinalities (|| and o<).
